SPARK in Spain: A Successful Journey to Digital Confidence

SPARK: Seniors Participation in Advancing Digital Resilience and Green Knowledge
Project ID: 2024-1-EL01-KA122-ADU-000239858

We are excited to share that our first SPARK group mobility was a resounding success! From October 1st to October 10th, 2025, 13 of our learners joined our partners at Asociación HeartLab in Spain for a transformative 10-day programme focused on digital resilience .

Achievements at a Glance:

This mobility was more than just a trip. It was a deep dive into the world of digital tools. Guided by the European DigComp 2.2 framework, our participants worked through hands-on workshops that turned digital challenges into everyday skills. The progress was measurable: through pre- and post-assessments, we saw our learners grow in both their technical abilities and, most importantly, their personal confidence .

What we accomplished:

- Navigating the Digital World: Participants mastered the basics of internet use and safety, ensuring they can browse and communicate with confidence .
- Accessing Essential Services: We provided hands-on training for vital portals like Your Europe, eIDAS, the EUDI Wallet, and e-EFKA. Our learners are now better equipped to manage their health and administrative tasks online .
- Official Recognition: Every participant successfully completed the programme and received a Europass Mobility certificate, officially validating the new skills they brought home .
- Connection & Community: Beyond the workshops, the group felt truly welcomed and integrated by the HeartLab team, proving that digital learning is a social and communal experience .

A Lasting Impact:

The feedback from our participants has been wonderful. They returned to Greece not only with new technical skills but with a renewed sense of independence. The materials and methodologies we tested in Spain have now become a core part of EQUALINE's educational library, ensuring that the impact of this mobility will continue to benefit our learners for years to come .

Thank you to our partners at HeartLab and to our 13 incredible learners for making this first mobility a milestone for SPARK. We are proud of the digital resilience you have built together!
